**Explanation:**

**External Factors** (check all that apply):

| <input type="checkbox"/> This Program/Service Cannot Fix The Problem         |  |
| <input type="checkbox"/> Current Laws Are Working Against The Agency Mission |  |

**Explanation:** As the output measure is currently expressed, a decrease in the number will usually indicate an improvement in external factors that the activity responds to, meaning that fewer manatees were in need of medical attention. External factors such as weather, red tide events, natural disease, effectiveness of management actions and enforcement can affect the number of sick and injured manatees that require medical treatment and rehabilitation.

**Management Efforts to Address Differences/Problems** (check all that apply):
