Recommendations:

Ultimately, the desired standard and achieved results for this measure would be zero. This standard is expected to fluctuate each year. It is difficult to identify specific activities that would guarantee consistent statistics in this standard. The number of accidents that occur and are reported directly impact the number of boating accident investigations. Many external factors, which are outside the control of the Division, contribute to the number of boating accidents. It is our goal to continue to emphasize

boating safety and public education, combined with an enforcement presence, to effect a reduction in the number of boating accidents, injuries, and fatalities.
